

Cord Guide/Winder + Storage Cassette Reel + Wall Storage Mount

FreeReel System

FreeReel Quick Start Guide

Thank you for your FreeReel purchase. We hope you find it to be a great method for managing your cords and hoses.

FreeReel users tell us the best way to learn how to use it is via video. 3 great ways to access the learning videos:

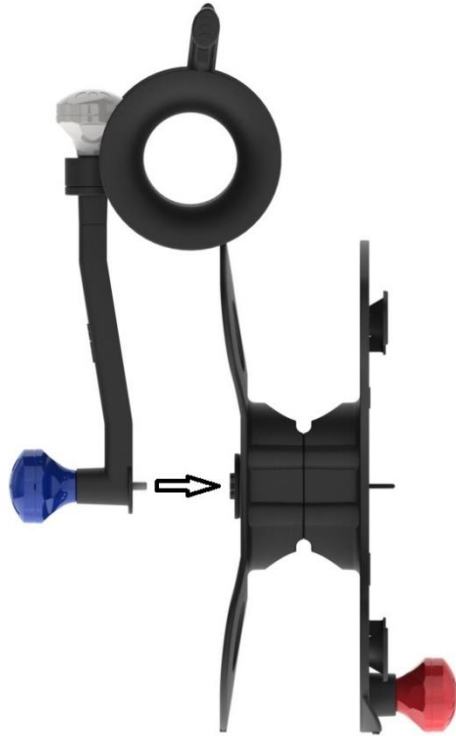

- 1) Use your phone and text EZFreeReel to 797979. Follow the link in the return text
- 2) Use this link: www.tinyurl.com/freereel
- 3) Use this QR code:

If you do not have internet access, please use this Quick Start Guide.

HOWEVER, if you are having any issues using the FreeReel, please, please contact us. We would love to figure it out with you. Our contact information is on the last panel of this guide.

Initial Assembly

First, remove everything from the shipping box. Next, using the Blue Handle, tighten the crank arm and cord guide to the storage reel. The back of the crank arm should sit flat on the main bearing front surface.

Unwinding

The FreeReel comes loaded with 550 paracord rope so that you can practice how to use it.

Walk

Away

Tie the free end of the paracord rope to something that won't move. Then grasp the upper handle with your right hand, put your right thumb on the thumb pad, and walk away. The rope will come off of the reel as you walk.

Winding

1. Continuing what you were just doing while unwinding. Walk away from where the rope is tied until almost all of the rope is off of the storage reel cassette
2. Leave the rope on the reel
3. Move your left hand to the blue handle
4. Move your right hand to the red handle (Remember Red=Right)
5. Put the cord guide against your stomach.
6. The rope should be coming up from the ground to the cord guide.
7. Start winding with your right hand
8. Walk along the rope or cord or hose as you wind onto the storage cassette reel

4

Practice winding and unwinding a couple of times with the paracord rope. When you feel like you know how to do it, take the rope off of the reel and replace it with your extension cord or air hose.

This should get you started using the FreeReel.

The FreeReel has been designed and developed to be the most versatile cord, rope and air hose management system. There are many additional features that are described on our website.
